Internship Experience

2024.06 - 2024.07 **Dalian Deep Matrix Technology Co., LTD**

Internship Description: Developed an intelligent service platform based on the Zhipu Qingyan GLM-4 large model, providing users with functions such as email management, role switching, intelligent model question answering, local function library invocation, address book management, and route guardian.

Certificates of Honor

1. Second Class Scholarship for 2021-2022 and First Class Scholarship for 2022-2023;
2. Outstanding Student of Dalian Minzu University 2023-2024 academic year;
3. Outstanding Student Leader of the 21st Youth League and Student Organization, School of Computer Science and Engineering, Dalian Minzu University;
4. Dalian Minzu University "Dao Zhonghua Cup" College Students' Speech Contest won "Outstanding Award";
5. In 2024 "Foreign Language Teaching and Research Press · China Talent Cup" "Understanding Contemporary China" National College Students' Foreign Language Proficiency Competition, won the bronze award in the comprehensive ability category;
6. In 2022, the 8th National College Students' Summer Practice Demonstration Activity was awarded "TOP100 National College Students' Summer Practice Projects".

Research Experience

2024.04-2024.07 Sentiment Analysis of Twitter User Comments Based on Long Short-Term Memory Networks

Research Description: Sentiment analysis of Twitter user comments based on the bidirectional LSTM network achieved 91% and 98% accuracy on comments with complex symbols and simple words, respectively, and 88% accuracy on the overall test set. The published paper was accepted by the 2024 International Conference on Electrical Engineering and Intelligent Control (EEIC 2024) hosted by CIC.

2023.06-2024.06 Facial expression transfer Based on First Order Motion

Research Description: Development of facial expression transfer system based on First Order Motion, using self-supervised keypoint detection and dynamic image drive, achieving realistic expression transfer from template image to drive video without prior information. The project was successfully approved under the 2023 College Students' Innovation and Entrepreneurship Training Program.

Self-evaluation

I have a solid foundation in C language and Python, and have worked on projects such as a banking business simulation system and the development of an intelligent service platform based on the GLM-4 large model. I am quick-witted, have strong problem-solving skills, and am proficient in using office software. I also have strong logical thinking abilities.

I have good English listening, speaking and writing skills, with an IELTS score of 6.0. I have good Chinese expression skills, am good at document writing, and have copywriting and organizational skills. I have participated in and been responsible for the planning and organization of a large-scale event with 200 people. I have good communication and interpersonal skills, and am a team player with strong leadership, planning and execution abilities.

I am outgoing, diligent and responsible. I have a strong desire and ability to learn, and can quickly master the skills required for work. I have a strong self-motivation. I also have a certain ability to handle pressure and am brave and meticulous when facing problems.
